Hammer Chisels

High Performance Masonry Removal

Proline™ chisels are demolition tools engineered for high performance masonry removal in electric power tools. These tools are used in a broad range of applications including road construction, pavement work, bridge construction, utility installation, demolition and a variety of maintenance functions.

Proline™ chisels are forged from high quality steel and ground using CNC machinery. Our chisels are hardened and tempered under strictly controlled manufacturing process for optimal masonry removal and long tool life. All Proline™ chisels are oil quenched and shot blasted for additional stress relief and anti-rust lacquered in natural finish. Laser marked shanks ensure positive identification.

HEADS

Bull (moil) Point: General concrete demolition.

Flat Chisels: General concrete demolition Available in narrow (1") and wide (2", 3") versions for cutting pavement overlay.

Clay Spade: Clay and other rock-free soil cutting.

Asphalt Cutter: Asphalt, hardpan and compacted soil cutting.

Bushing Tool: Roughing up or concrete surface removal.

SHANKS

CM96 SDS-Max Chisels: For large rotary hammers with SDS-Max drive.

CM97 Spline Shank Chisels: For large rotary hammers with spline drive.

CM90 1-1/8" Breaker Chisels: For electric breakers requiring 1-1/8" notched shanks.

CM95 SDS-Plus Chisels: For SDS-Plus Hammer Drills.

CM91 3/4" Hex Shank Chisels: For demolition hammers which use 3/4" accessories.
